Benefit from our extensive Finance Transformation experience and insights

Finance teams are continually expected to modernise and enhance their capabilities while also continuing to maintain their traditional functions.

An organisation's finance function is a critical source of competitive advantage. Leveraging finance talent within the company to act as true business partners, equipped with the right tools can lead to enhanced decision making across the organisation.

Many finance functions struggle with legacy systems, manual processes and poor structures. Demands from the business can be constant as it looks to finance to support it.

We understand that delivering best-in-class financial insights in your company requires tailored, responsive solutions encapsulating people, processes and technology.

Our Finance Transformation consultants work with finance executives who want to add value, save time and save money. We work with organisations to ensure that their finance functions are more efficient than competitors and are working as one team to deliver timelier insights to decision-makers, which ultimately drives strategy and growth.

Grant Thornton has robust, custom-tailored solutions to tackle your most critical business issues.

Our offerings

Our Finance Transformation team supports finance leaders in understanding the factors that drive an effective finance function, as well as designing and implementing operating models and process improvements, which deliver increased value to your business.

The Finance Transformation service line within Grant Thornton Business Consulting is focused on a set of offerings which assist our clients with driving improvement in their finance function. Our product offering includes, but is not limited to the following services.

Finance function review

Undertaking a current state/'as-is' review of the finance function with a focus on people, processes and technology. Our team engages with key stakeholders to develop a clear view of the 'current state' and performs extensive analysis to identify inefficiency and ineffectiveness inherent within the broad finance function with a view to developing an improvement plan.

Process review

End to end reviews of critical processes such as order to cash and procure to pay. Our consultants perform a comprehensive review whereby key workflows are observed and assessed against best practice. Such a review is performed in an objective manner and will enable critical analysis of core finance functions.

Business intelligence/analytics

Design and development of purpose built business intelligence/data analytical tools. Our team will work closely with you and your team to define data requirements and user needs to develop data analysis and reporting tools which provide critical insights into financial performance and enable better financial management.

Automation

Implementation of automation solutions within your finance function. Our consultants assist you in identifying finance processes which are suitable for automation and manage the implementation of same, including associated training. This results in tangible benefits to your business, including cost savings and reduced human error.

We help to design and implement change to the finance organisation, processes and systems in order to improve the overall value of finance.

Our team

Grant Thornton has an experienced team of Finance Transformation consultants who have a wealth of experience assisting both private and public sector clients across a broad range of industries.

Our team is agile and flexible and is ready to develop tailor made and bespoke solutions to align with your needs and address the core challenges facing your finance function.

Grant Thornton will provide you with access to highly skilled and experienced Finance Transformation experts.
